

راهنمای عبور از خطای Certificate

دستورالعمل

مرورگر Internet Explorer

 There is a problem with this website's security certificate.

The security certificate presented by this website was not issued by a trusted certificate authority. The security certificate presented by this website was issued for a different website's address.

Security certificate problems may indicate an attempt to fool you or intercept any data you send to the server.

We recommend that you close this webpage and do not continue to this website.

Your connection is not private

Attackers might be trying to steal your information from **mail.alzahra.ac.ir** (for example, passwords, messages, or credit cards). NET:ERR_CERT_AUTHORITY_INVALID

[Hide advanced](#) [Back to safety](#)

This server could not prove that it is **mail.alzahra.ac.ir**; its security certificate is not trusted by your computer's operating system. This may be caused by a misconfiguration or an attacker intercepting your connection.

[Proceed to mail.alzahra.ac.ir \(unsafe\)](#)

مرورگر Firefox

This Connection is Untrusted

You have asked Firefox to connect securely to **mail.alzahra.ac.ir**, but we can't confirm that your connection is secure.

Normally, when you try to connect securely, sites will present trusted identification to prove that you are going to the right place. However, this site's identity can't be verified.

What Should I Do?

If you usually connect to this site without problems, this error could mean that someone is trying to impersonate the site, and you shouldn't continue.

▼ I Understand the Risks

If you understand what's going on, you can tell Firefox to start trusting this site's identification. **Even if you trust the site, this error could mean that someone is tampering with your connection.**

Don't add an exception unless you know there's a good reason why this site doesn't use trusted identification.
